

Lloyd Mini - Showroom Refurbishment

Lloyd Mini decided on a retro theme for their new showroom. The entrance fascia panels were removed and taken away to be professionally sprayed in high gloss black and refitted by our team. We stripped the showroom bare from ceiling to floor ready for us to begin the refurbishment.

A sleek café bar area was included in the refurbishment for a more relaxed feel. What really stepped up this funky design in the showroom was the installation of the two orange padded sales booths, incorporating a built-in flat screen.

Throughout the Mini showroom you can find Hi-tech surround sound and flat screen TV's as well as designer art work, neon signs and high spec furniture. Two sales offices were created with the installation of Optima Mistral double glazed partitions which allows maximum lights but also incorporate integral blinds for privacy when needed. The office are also fitted out with magnetic pressure storage wall cupboards

SAS Black High gloss suspended ceiling system with fitted lighting above each car in the showroom to give each car a mirrored image.
